

Welcome to the Paleoecology Module!

Overview

This module has two activities centered on data from a core sediment sample taken from Sutherland Pond in Black Rock Forest.

In the Pollen Identification Activity, students learn how to identify pollen grains and other plant macrofossils from a pond core sample.

In the Core Sediment Sampling Activity, students learn strategies for efficient sampling of a pond core to ensure the capture of the relevant changes in the pollen record over time.

This module is currently being developed by the Center for New Media Teaching and Learning in collaboration with Dr. Terryanne Maenza-Gmelch of the Department of Environmental Science at Barnard College.

This Module Contains Two Activities:

[Start Pollen Identification Activity >>](#)

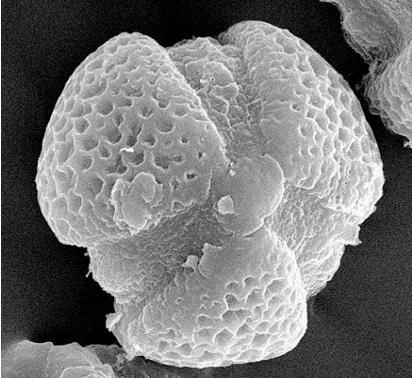

[Start Core Sediment Sampling Activity >>](#)

1. Identify Specimens

2. Review Correct Identifications

Instructions: Use the appropriate interactive key to identify each of the pictured specimens. You may change your answer any time by clicking on a specimen you have already identified.

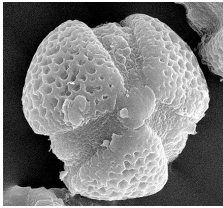

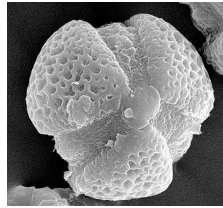

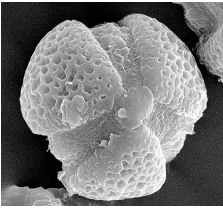

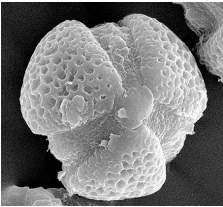

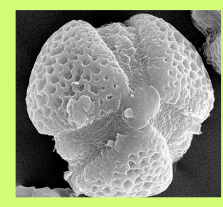

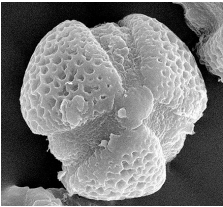

▼ Identify this Specimen

1.a. The penguin has a blue gray back
Go to #2.

Yes

No

1.b. The penguin has a black back
Go to #3.

2.a. The flipper is bordered with white on both edges

white-flipped penguin
Eudyptula albosignata

2.b. The flipper is bordered with white only on the back edge

little blue penguin
Eudyptula minor albosignata

3.a. Stands under 31/2 feet tall
Go to #4.

3.b. Stands over 31/2 feet tall

Emperor Penguin
Aptenodytes forsteri

4.a. Yellow/orange markings on head
Go to #5.

4.b. No yellow/orange markings on head
Go to #12

1. Identify Specimens

2. Review Correct Identifications

Instructions: Use the appropriate interactive key to identify each of the pictured specimens. You may change your answer any time by clicking on a specimen you have already identified.

Ivy Seed

1. Explore Sediment Core

2. Select Sampling Intervals

3. Choose and justify an ideal interval

Step 1:

Explore the sediment core at left to find a sampling interval which will enable you to capture all relevant changes in the pollen record over time. You will be asked to justify your interval choice, as well as describe the history of the pond, at the end of this activity.

When you are ready to choose samples for "lab" analysis, click "Select Sampling Intervals" button below.

Select Sampling Intervals >>

1. Explore Sediment Core

2. Select Sampling Intervals

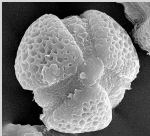

3. Choose and justify an ideal interval

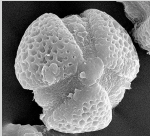

Sample Depth: 596cm

Sample base: mixed sand and clay

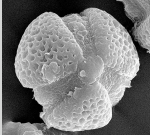

Specimens in this sample

Pollen A:
450 grains

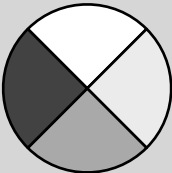

Pollen B:
50 grains

Needle A:
5 needles

Species breakdown

 Pollen A: 95%

 Pollen B: 3%

 Needle A: 2%

Select Sampling Intervals >>

1. Explore Sediment Core

2. Select Sampling Intervals

3. Choose and justify an ideal interval

Step 2:

Based on your previous exploration, choose intervals to sample. If you do not like your results, you may return to this step later.

When you are ready to submit samples to the "lab" for analysis, click "Run Sample" button below.

Section 1:	Sample every	<input type="text"/>	cm
Section 2:	Sample every	<input type="text"/>	cm
Section 3:	Sample every	<input type="text"/>	cm
Section 4:	Sample every	<input type="text"/>	cm
Section 5:	Sample every	<input type="text"/>	cm
Section 6:	Sample every	<input type="text"/>	cm
Section 7:	Sample every	<input type="text"/>	cm
Section 8:	Sample every	<input type="text"/>	cm
Section 9:	Sample every	<input type="text"/>	cm
Section 10:	Sample every	<input type="text"/>	cm
Section 11:	Sample every	<input type="text"/>	cm
Section 12:	Sample every	<input type="text"/>	cm

SAMPLING SUMMARY

TOTAL # SAMPLES ANALYZED	23
SPECIES IDENTIFIED	5
TOTAL # SPECIMENS	215
CARBON AGE SPAN	200 YEARS

SAMPLING DETAILS

SAMPLE #	SAMPLE DEPTH	CARBON AGE	POLLEN A	POLLEN B	NEEDLE A	NEEDLE B	SEED A	TOTAL SPECIMENS
1	500cm (.5m)	8	22.3	xxx	xxx	xxx	xxx	xxx
2	1000cm (1m)	22	12	xxx	xxx	xxx	xxx	xxx
3	2200cm (2.2m)	3	4.7	xxx	xxx	xxx	xxx	xxx
4	2400cm (2.4m)	11	5	xxx	xxx	xxx	xxx	xxx
5	2600cm (2.6m)	12	45	xxx	xxx	xxx	xxx	xxx
6	2800cm (2.8m)	14	26.8	xxx	xxx	xxx	xxx	xxx
7	5000cm (5m)	2	132	xxx	xxx	xxx	xxx	xxx
8	10000cm (10m)	0	0	xxx	xxx	xxx	xxx	xxx
9	12000cm (12m)	5	12.5	xxx	xxx	xxx	xxx	xxx
23	1250cm (12.05m)	1	67	xxx	xxx	xxx	xxx	xxx
TOTAL: 10	TOTAL: 10	78	54.4	xxx	xxx	xxx	xxx	xxx

FOR DISCUSSION:

Referencing the data from your sediment sampling, describe the history of this pond as indicated by relevant pollen changes over time. Describe your thought process for choosing and settling on the intervals you selected for sampling. How did your choices affect...
